

# What does the sea say to the shore?

## A BERT based DST approach for speaker to dialogue attribution in novels

Carolina Cuesta-Lazaro, Animesh Prasad, Trevor Wood

**“I hope it is the best quality incense? I believe it varies.”**

**“Yes, I’ve seen advertisements,” I admitted, “and they have different names. Lambeth is very expensive, but Pax is quite cheap. It seems as if it ought to be the other way round.”**

**“And have you dozens of glamorous acolytes?”**

**“Well ...”** I hesitated, remembering Teddy Lemon, our Master of Ceremonies, with his rough curly hair and anxious face, and his troop of well-drilled, tough-looking little boys, **“they are very nice good boys, but perhaps you should go to a Kensington church if you want to see glamorous acolytes.”**

**“I hope it is the best quality incense? I believe it varies.”** ROCKINGHAM NAPIER

**“Yes, I’ve seen advertisements,” I admitted, “and they have different names. Lambeth is very expensive,**

**but Pax is quite cheap. It seems as if it ought to be the other way round.”** MILDRED LATHBURY

**“And have you dozens of glamorous acolytes?”** ROCKINGHAM NAPIER

**“Well ...”** I hesitated, remembering Teddy Lemon, our Master of Ceremonies, with his rough curly hair and

anxious face, and his troop of well-drilled, tough-looking little boys, **“they are very nice good boys, but**

**perhaps you should go to a Kensington church if you want to see glamorous acolytes.”** MILDRED LATHBURY

# MILDRED LATHBURY

Also known as Miss Lathbury  
Female  
Early 30s  
Strong and Independent

# ROCKINGHAM NAPIER

Also known as Rocky and Elena's husband  
Male  
Early 30s  
Attractive, adventurous, and full of confidence

3. Matching

# Identifying characters the easy way

Leyers returned the salute with less enthusiasm . Rauff was about to leave , when he fixed on Pino for several seconds . Pino could feel his attention dancing all over him .

“Vorarbeiter ,” General Leyers **called** . “We are leaving . Bring the car around .”

“Jawohl , General ,” Pino **said** in his best German , and then hurried past the two Nazi officers , never once looking at Rauff , but feeling his flat dark eyes fixed on him .

# Using Named Entity Recognition

Leyers returned the salute with less enthusiasm . Rauff was about to leave , when he fixed on Pino for several seconds . Pino could feel his attention dancing all over him .

“Vorarbeiter , ” General Leyers called . “We are leaving . Bring the car around . ”

“Jawohl , General , ” Pino said in his best German , and then hurried past the two Nazi officers , never once looking at Rauff , but feeling his flat dark eyes fixed on him .

NORP PERSON ORG

# How these solutions stack?

NER: Inferred with Muzny et al., EACL 2017.

Rule Based: Explicit dialogue attribution signals

Model	F1-Score	Precision	Recall
NER	$0.74 \pm 0.1$	$0.82 \pm 0.08$	$0.69 \pm 0.14$
Rule-based	$0.78 \pm 0.1$	$0.85 \pm 0.07$	$0.76 \pm 0.11$

# Are they the same person?

Type	Freq	Example ([mentions] → entity)
Full Name Variation	67%	[Harry, Potter, Mr. Pouer, Harry Potter] → HARRY POTTER)
Dimunitives	7%	[Lizzy, Eliza] → ELIZABETH
Professional	15.5%	[the cook] → JOHN KING SILVER
Relational	5.5%	[her father] → MR. BENNET
Others	5%	[the cimmerician] → CONAN

# Clustering Characters

## Rule (Name) Based Co-reference Resolution

Pino Lella

Pino

Michelle

Pino's father

Il Duce

Father

Father Re

The priest

Mussolini

Benito Mussolini

The dictator

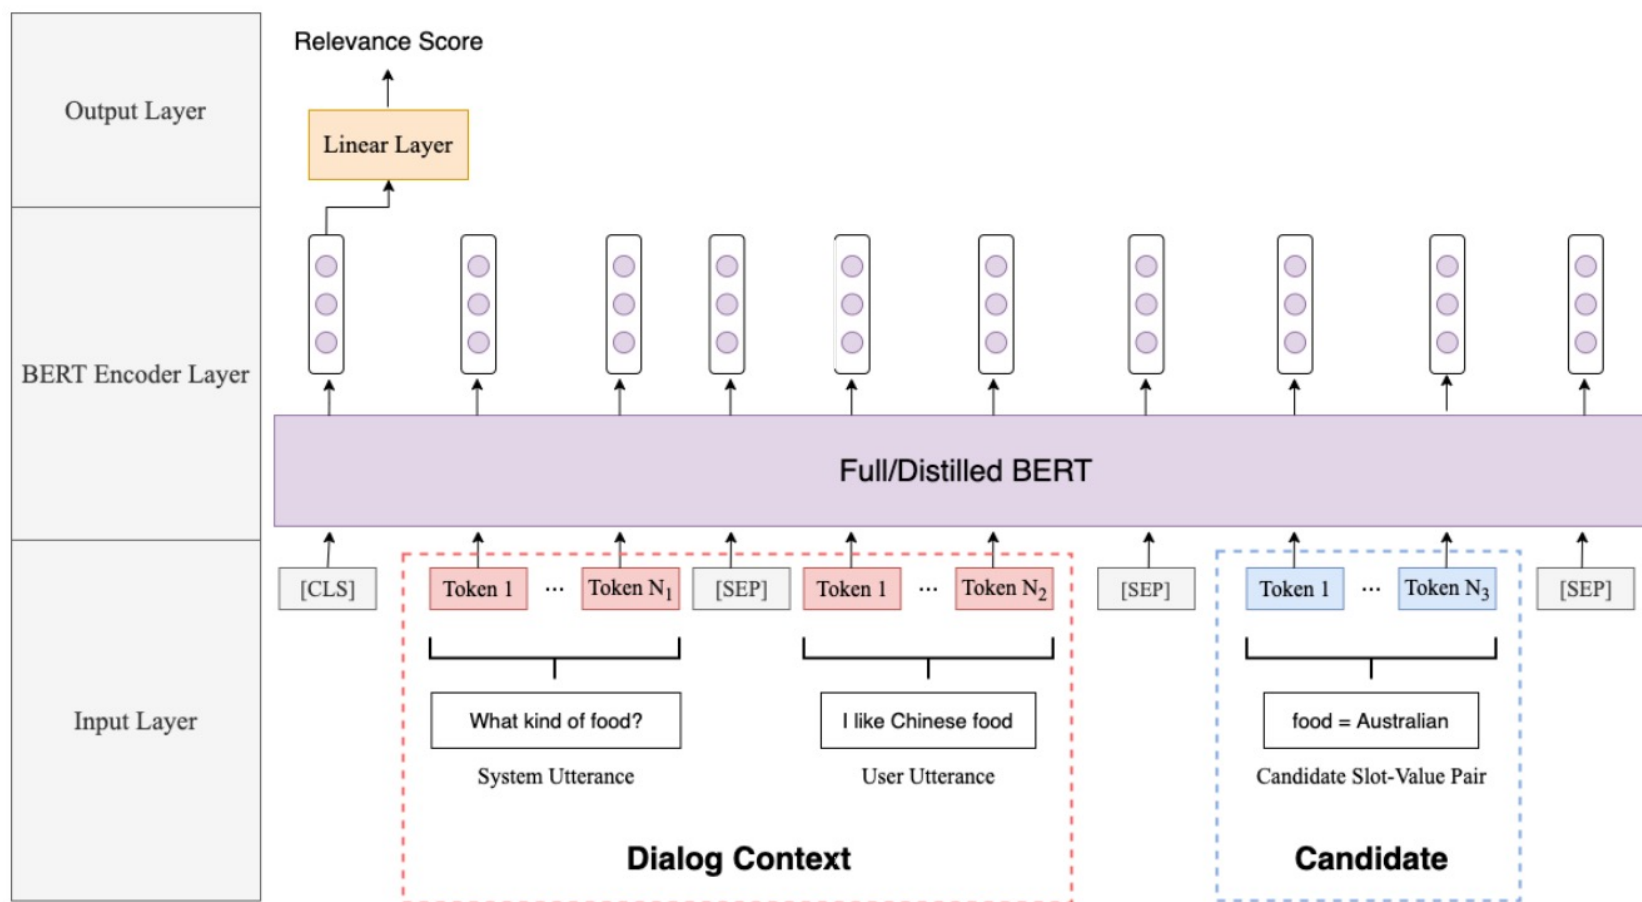

# How these solutions stack?

Coreference: Inferred with Muzny et al., EACL 2017.

Rule Based: Salutation and Surname Compatibility

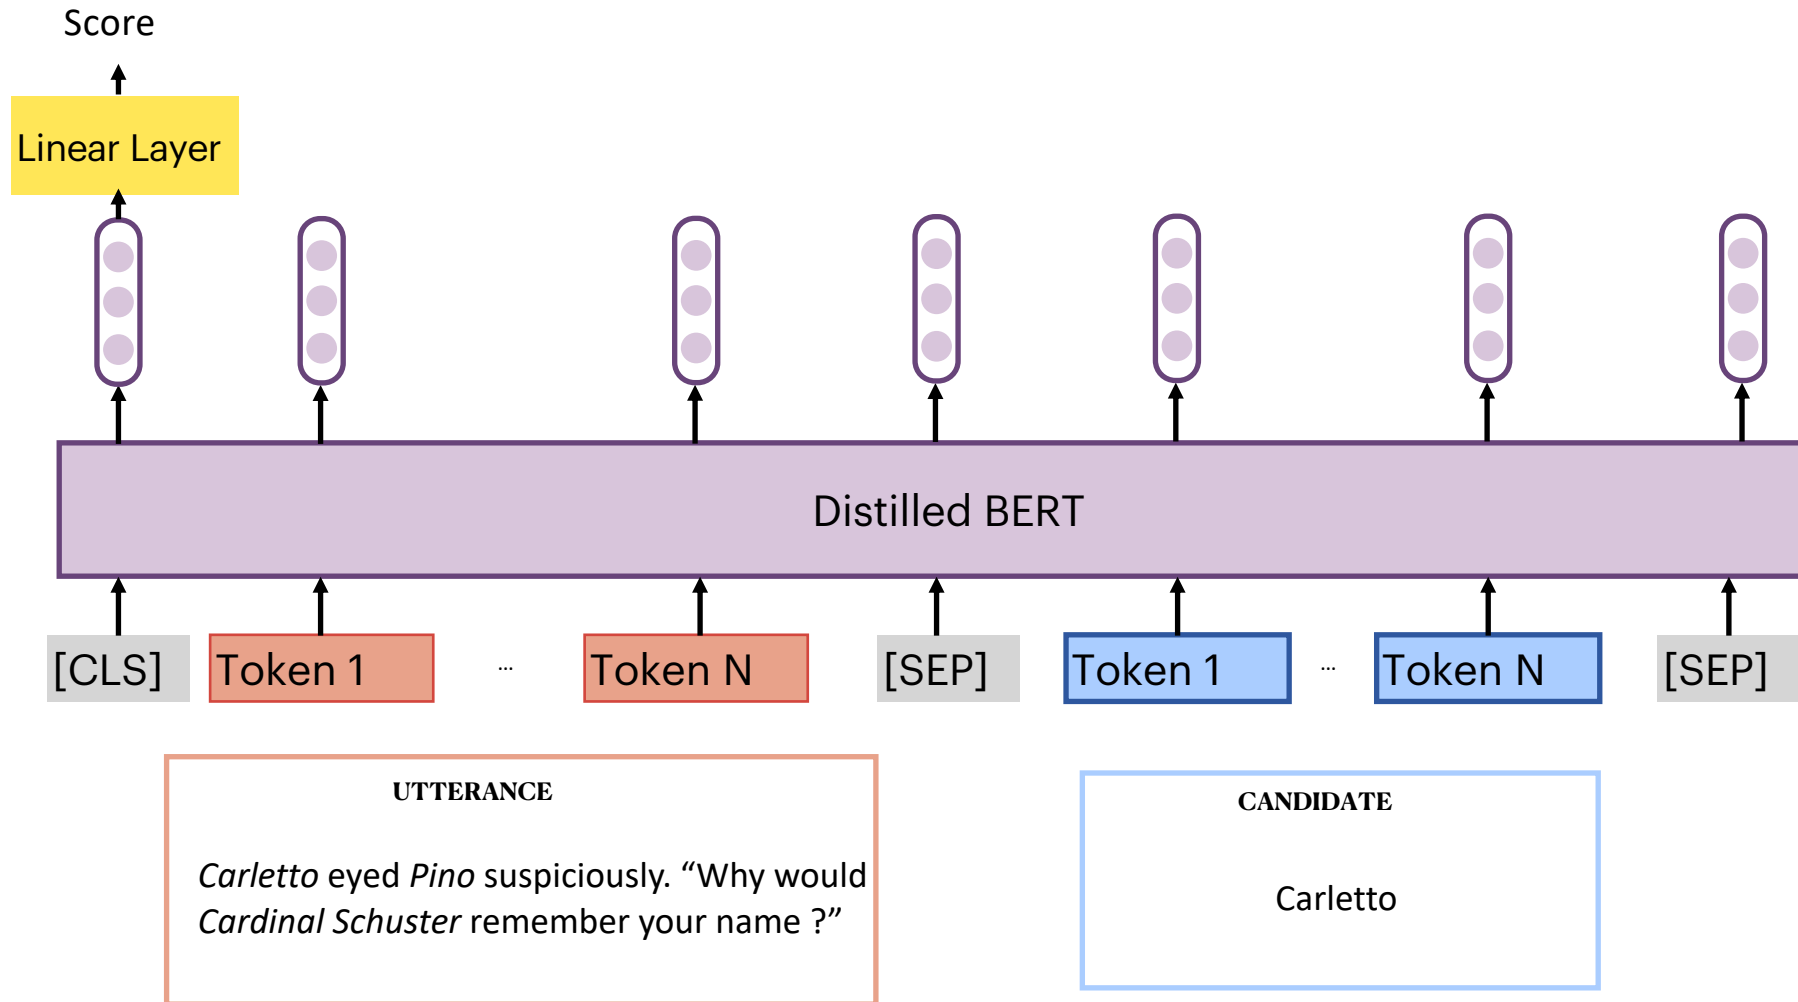

Model	F1-Score	Precision	Recall
Coreference	$0.73 \pm 0.1$	$0.97 \pm 0.08$	$0.60 \pm 0.14$
Rule-based	$0.86 \pm 0.08$	$0.94 \pm 0.07$	$0.79 \pm 0.11$

# Attributing Speakers as Dialogue State Tracking

# One step at a time: Explicit speakers

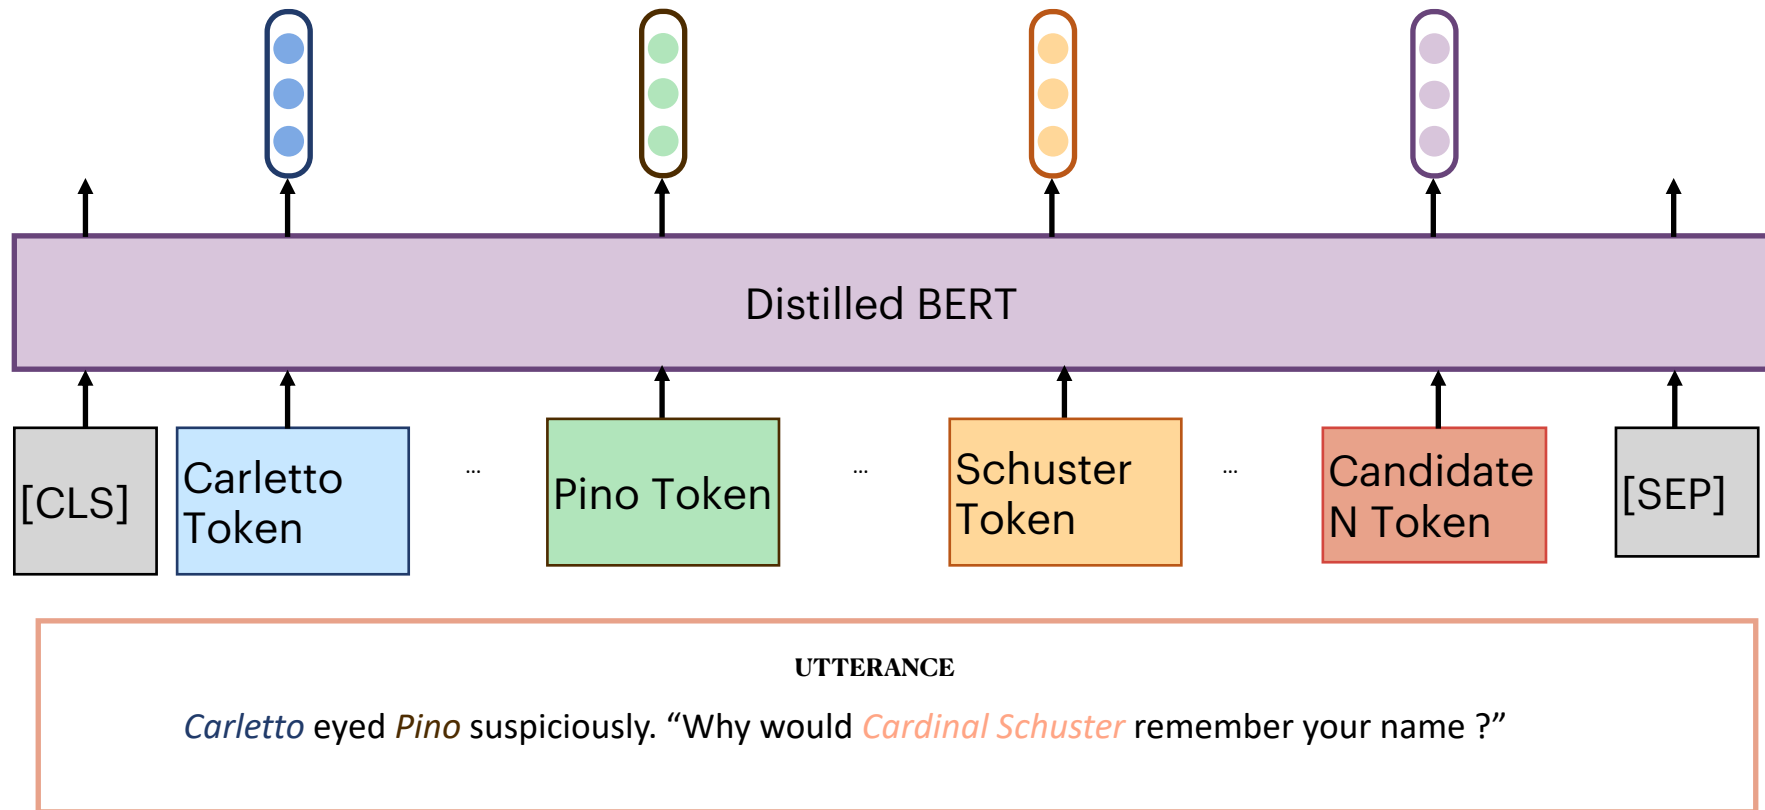

# One step at a time: Explicit speakers

# Stable speaker representations

Uses average for multi-token names

# Summarising conversations

## CONVERSATION

**U0:** *Poole* was asleep, and *Bowman* was reading on the control deck, when *Hal* announced:

**U1:** "Er- *Dave*, I have a report for you"

**U2:** "What's up?"

**U3:** "We have another bad AE-35 unit. My fault predictor indicates failure within twenty-four hours."

## U1

$P(\text{POOLE}|u)$

$P(\text{BOWMAN}|u)$

$P(\text{HAL}|u)$

## U2

$P(\text{POOLE}|u)$

$P(\text{BOWMAN}|u)$

$P(\text{HAL}|u)$

## U3

$P(\text{POOLE}|u)$

$P(\text{BOWMAN}|u)$

$P(\text{HAL}|u)$

# Learning to take turns with Conditional Random Fields

$$\text{Score}(\mathbf{y}|\mathbf{u}) = \sum_{n=0}^N \overset{\text{Entity logits from RNN}}{\mathbf{E}_n(y_n|\mathbf{u})} + \sum_{n=0}^{N-1} \overset{\text{Transition Matrix}}{V_{y_n, y_{n+1}}}$$

	Character 0	Character 1	Character 2	
$V =$	$(-)X$	$Y$	$Y$	Character 0
	$Y$	$(-)X$	$Y$	Character 1
	$Y$	$Y$	$(-)X$	Character 2

# How does this solutions stack?

Our (Proposed) model

Nearest mention Baseline

Model	F1-Score	Precision	Recall
Our model	$0.78 \pm 0.06$	$0.81 \pm 0.06$	$0.77 \pm 0.06$
NM	$0.54 \pm 0.08$	$0.57 \pm 0.06$	$0.54 \pm 0.08$

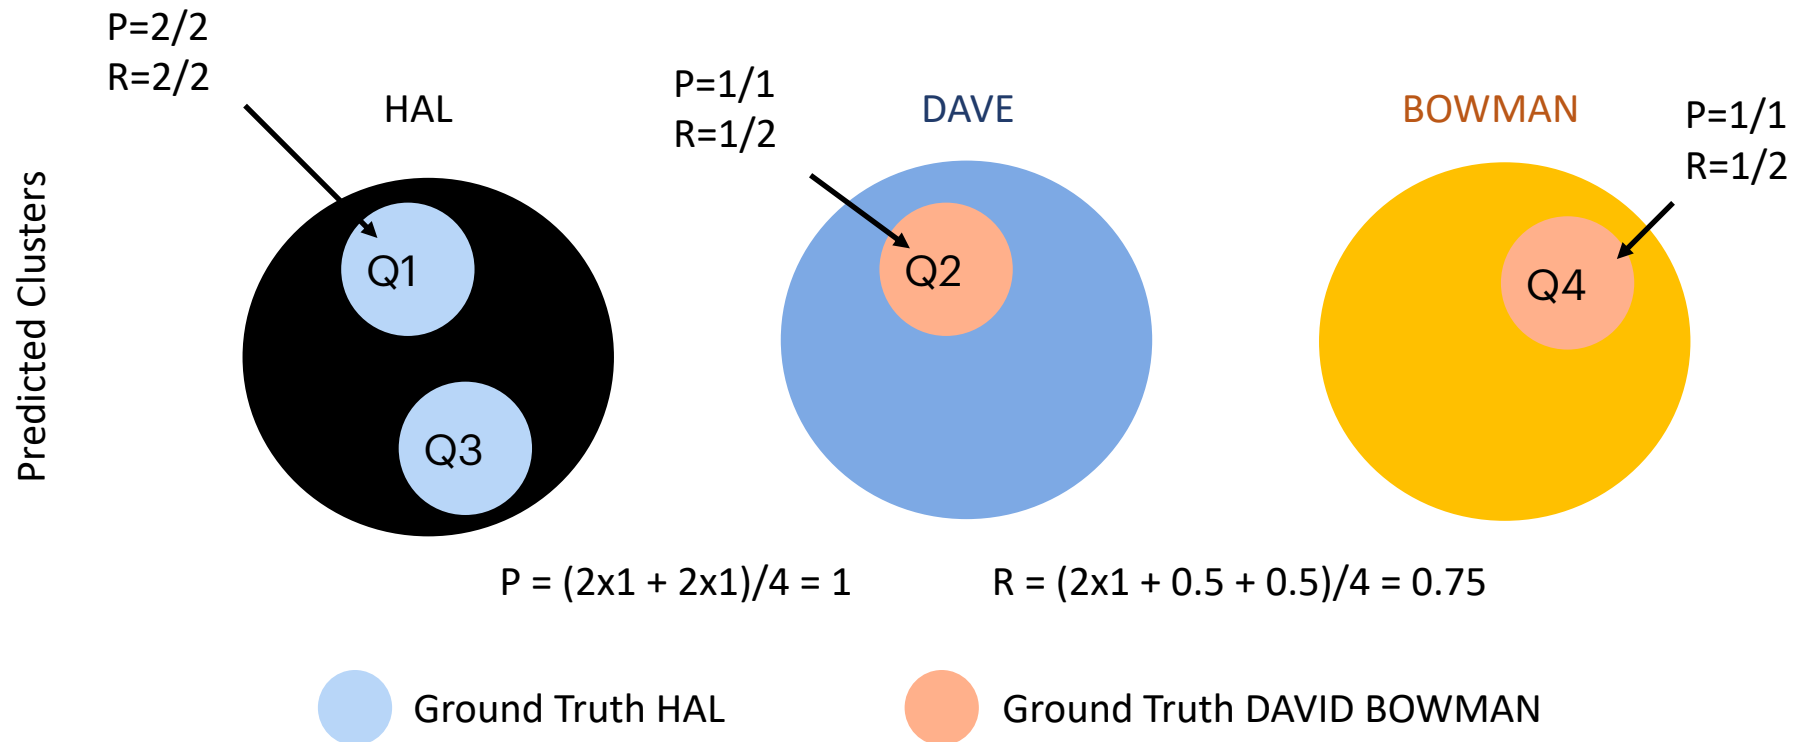

# How can we evaluate the pipeline? Clustering!

**U1:** “Er- *Dave*, I have a report for you”

**U2:** “What’s up?”

**U3:** “We have another bad AE-35 unit. My fault predictor indicates failure within twenty-four hours.”

**U4:** “I don’t understand it, Hal”, said Bowman

# Leave one out evaluation

# Challenges? (And easy wins!)

Unification of pipeline approaches, maybe as additional targets

- NER

An instance of local versus global processing

# The good and the bad

He was met by Tuthmes , tall , slender , dusky , with the straight features of his caste .

“What are you saying , Afari ? ” **THUTHMES**

Afari closed the door before he answered; he was panting as if from a long run . He was shorter than Tuthmes , and the negroid was more predominant in his features .

“Amboola ! He is dead ! In the Red Tower !

” **THUTHMES**

“What ? ” exclaimed Tuthmes . “Tananda dared execute him ? ” **THUTHMES**

“No ! No , no ! [...] Tuthmes , it is the work of some demon ! ” **MAN**

“When was this done ? ” **THUTHMES**

“Sometime about midnight . [...] ” **THUTHMES**

Error: Afari is not in the character list!

Tall and lissome , Dr Brooks moved with the assertive gait of an athlete . [...]

“Dr Marconi doesn’t speak much English , ” she said , sitting down beside him , “and he asked me to fill out your admittance form . ” She gave him another smile . **DR SIENNA BROOKS**

“Thanks , ” Langdon croaked . **ROBERT LANGDON**

“Okay , ” she began , her tone businesslike . “What is your name ? ” **DR SIENNA BROOKS**

It took him a moment . “Robert ... Langdon . ” **ROBERT LANGDON**

She shone a penlight in Langdon’s eyes . “Occupation ? ” **DR SIENNA BROOKS**

This information surfaced even more slowly . “Professor . Art history ... and symbology . Harvard University . ” **ROBERT LANGDON**

Thank You and Questions!
